

100% PRACTICAL & PROJECT-BASED CURRICULUM

Simple, No-Code & Actionable AI Learning

Designed for complete beginners and future creators. No complicated programming required. Learn to use smart AI tools, create video content, build conversational Voice Agents, command Google Antigravity agents, and build real digital projects to earn online.

 **AI Advanced**

2 Months • 9,000 PKR

Self-Contained: Prompting, Custom Bots, Conversational Voice Agents & Micro-SaaS

AI Advanced — 2 Months Track (100% Self-Contained)

Direct Enrollment Ready: Starts with foundational prompt engineering & creative media, builds custom GPTs and Conversational AI Voice Agents, deep-dives into Google Antigravity AI Agents & Agent Skills, builds 3D animated websites & web apps, converts them into Micro-SaaS software, and teaches internet lead scraping with client outreach.

ADVANCED MODULES			
01 AI Basics & Prompting	02 Custom GPTs & Chatbots	03 Images & AI Video Media	04 Conversational Voice Agents
05 Antigravity AI Agents	06 Agent Skills & Superpowers	07 3D Sites & Micro-SaaS	08 Scraping, Sales & Upwork

01

What is AI, How LLMs Work & Advanced Prompting

Self-Contained • Deep Understanding • Advanced Prompts

ChatGPT

Google Gemini

Advanced Prompting

- What artificial intelligence is and how LLMs process information
- Advanced prompt engineering: System instructions, role prompting, and formatting
- Chain-of-Thought prompting to make AI reason through complex tasks
- How to get structured tables, lists, and exact outputs reliably
- Controlling tone, depth, and preventing hallucinations in AI answers

HANDS-ON BUILD 1

Design an Advanced Multi-Step Prompt Master Engine

02 Building Custom GPTs & Knowledge Chatbots

Custom Assistants • Private Docs • Smart Rules

Custom GPT Builder

Gemini Gems

Doc Assistant

- What Custom GPTs and AI Assistants are and why businesses need them
- Setting up custom instructions, behavior rules, and constraints
- Feeding private PDFs, product catalogs, and documents into a bot
- Building specialized customer support and sales inquiry assistants
- Testing your bot to ensure it answers only from verified company data

HANDS-ON BUILD 2

Build a Branded Customer Support & Document AI Chatbot

⚡ Sellable as: Business Support Bot (\$300+)

03 Creative Media: AI Images & Video Generation

High-Quality Visuals • Google Flow / Omni • Content Assets

ChatGPT / Gemini Images

Google Flow / Omni Video

Visual Assets

- Generating production-grade images and UI visuals using ChatGPT & Gemini
- Text-to-Video and Image-to-Video generation using Google Flow and Omni tools
- Creating high-converting marketing assets, banners, and video demos
- AI voice generation and realistic sound effects for video content
- Creating complete visual asset packs needed for client websites and apps

HANDS-ON BUILD 3

Create a Full Visual Asset & Video Marketing Package

⚡ Sellable as: AI Video Ad & Creative Package (\$250+)

04 Building Conversational AI Voice Agents & Receptionists

Spoken AI Dialogues • Inbound Call Handling • Voice Widget

Voice Agent Builder

Conversational Voice

Live Call Flow

- Introduction to real-time conversational voice agents and telephony
- Building automated spoken voice agents with customizable personas
- Setting up voice tone, natural accent, speaking speed, and behavior rules
- Training the voice agent with company FAQ documents and business knowledge
- Testing live interactive spoken conversations: Inbound inquiries & customer handling
- Embedding a live voice agent widget onto any client website

HANDS-ON BUILD 4

Build and Deploy an Interactive AI Voice Receptionist

⚡ Sellable as: 24/7 Conversational AI Voice Agent (\$400+)

05

Autonomous AI Agents with Google Antigravity

Google Antigravity • Autonomous Workflows • Agent Ecosystem

Google Antigravity

Agentic Workflows

Autonomous Execution

- What makes an autonomous AI Agent different from a regular chatbot
- How autonomous agents read files, browse data, plan tasks, and self-correct
- Deep-dive into Google Antigravity and other modern agent systems
- How to give high-level business goals to an agent and supervise execution
- How to guide, debug, and improve an agent when it encounters obstacles

HANDS-ON BUILD 5

Set Up and Command an Autonomous Research & File-Building Agent

06

Agent Skills: Building Custom Superpowers

Custom Skills • Workflow Templates • Subagents

Agent Skills Architecture

Antigravity Skills

Subagents

- Understanding Agent Skills: Equipping agents with specialized capabilities
- How skills work (custom system prompts, step guides, templates, and scripts)
- Building custom skills to automate repetitive digital tasks and data handling
- Connecting subagents to collaborate on multi-step complex tasks
- Testing and refining custom agent skills for reliable output

HANDS-ON BUILD 6

Create and Equip a Custom Business Automation Agent Skill

⚡ Sellable as: Custom AI Agent Automation (\$400+)

07

3D Scroll Websites, Web Apps & Micro-SaaS

3D Animation • Modern Web Apps • Dashboards • Micro-SaaS

AI Agent Web Builder

3D Scroll Animation

Micro-SaaS MVP

- Using AI agents to plan and generate modern, high-converting websites
- Adding smooth 3D scroll animations, interactive floating cards, and responsive styling
- Building functional web applications with user dashboards and interactive forms
- Converting the application into a Micro-SaaS product with user accounts
- Deploying your live 3D website and Micro-SaaS prototype on the web

HANDS-ON BUILD 7

Build a 3D Animated Website & Deploy a Functional Micro-SaaS App

⚡ Sellable as: Premium Animated Site & Micro-SaaS (\$600-\$1,200)

08

Web Data Scraping, Outreach & Selling AI Services

Lead Scraping • Cold Outreach • Upwork / Fiverr • Client Sales

AI Web Scraping

Upwork & Fiverr

Client Proposals

- Using AI tools to scrape and extract business contact leads from the web
- Crafting personalized outreach messages that get client replies
- Setting up high-converting freelancer profiles on Upwork, Fiverr, and LinkedIn
- Packaging your AI skills: How to price websites, bots, and voice agents (\$300-\$1,500)
- Creating quick video audits (Loom) to close clients easily
- Live Capstone presentation and final course certification

FINAL ADVANCED CAPSTONE

Launch Your Freelance AI Agency Profile & Start Client Outreach

⚡ **Career Outcome: Ready to Win Paid Clients**
